DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rex Wong on 3-24-04. The application has been amended as follows: Please cancel claims 25-29 without prejudice.

Allowable Subject Matter

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:
the prior art fails to teach or obviously suggest the claimed invention.

3. Specifically, no teaching or obvious suggestion has been found of the limitation "to eject the charged particle from the ion trap when the amplitude of the audio frequency voltage is increased to a second amplitude."

4. While US Pat No. 5,572,035 issued to Franzen teaches the employment of an audio frequency voltage (see col.4, lines 20-26), Franzen does not teach or obviously suggest increasing the audio frequency voltage to a second amplitude for ejecting the charged particles as in claim 1, 10, and 15. Hence, the claimed invention is allowable over Franzen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
